

# Ryan Bonner | LEED BD+C, CHC PRESIDENT

Construction is a dynamic, diverse, and emotional industry. My main goal is to cultivate both professional and personal relationships with the project team. I strongly believe that working together increases the odds of succeeding together. Through early engagement with the user groups and designers, I will maximize our pricing options with the marketplace to help deliver a GMP on budget, that can be built on schedule.

## EDUCATION

- University of Colorado  
B.S. Civil Engineering
- Lean Construction Institute
